Gartner

#21 on Gartner Peer Insights
for MDR Services

#1 in Managed SIEM
services by Comparitech

UnderDefense is a global cybersecurity company. We are top-ranked by Gartner and Clutch in threat detection and incident response services.

Our platform, combined with our expertise, allows us to predict, prevent, detect, and respond to the most advanced and aggressive cyberattacks, ensuring clients' business continuity no matter what. We take pride in our personal approach to cybersecurity, both in addressing urgent issues and developing long-term strategies.

A holistic solution to protect your business at every step of the way

Our Security-as-a-Service platform offers free Compliance, advanced Managed Detection and Response (MDR), and no-code Security Automation and Orchestration allowing businesses of all sizes and maturity levels to protect their most valuable assets.

A security that never sleeps: our experts are always on

Threats don't take a break, so our security team works non-stop to protect your business. We provide 24/7 monitoring and response to detect and defeat any threat quickly and efficiently.

Cybersecurity as unique as your business

At UnderDefense, we understand that businesses use various tools and systems to operate. That's why we provide customized cybersecurity solutions that work in unison with your existing tools and systems.

Simplified approach, amplified protection

Strengthen your security posture while minimizing the complexity, so you can focus on growing your business. Our proven approach makes cybersecurity accessible, intuitive, and more effective for businesses of all sizes.

Maximizing your return on security investment

We believe every business should have access to top-quality cybersecurity, regardless of size or budget. That's why we've developed a cost-effective solution that delivers robust protection against cyber threats.

WHY WORK WITH US

UnderDefense Security-as-a-Service Platform

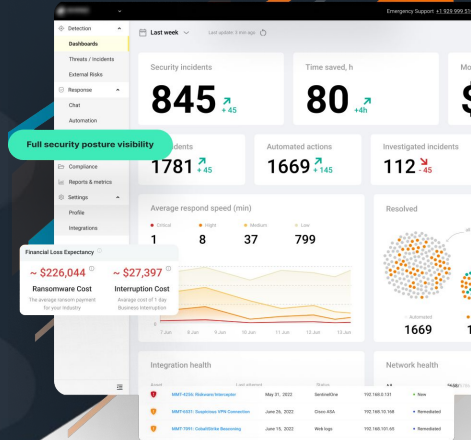

Your ONE-STOP SHOP for security and compliance

We've made cybersecurity simple, affordable, and consistent through the unification of currently disjointed security tools from multiple vendors to fully visualize, correlate through AI, and automatically detect, investigate, and respond to all possible attacks.

Our Compliance, XDR/MDR & Incident Response Automation solution for cloud, hybrid, and on-premise environments allows companies to prevent breaches in minutes not hours and eliminates the consequences of the most sophisticated attacks.

Added value portal for our MDR customers that provides:

- Full security posture visibility
- Direct hotline with Concierge Team
- Possibility to conduct on-demand hunts
- Dynamic reporting on compliance, vulnerabilities, operational security at your fingertips at any time, and many more features

24/7/365 Turnkey Managed Detection & Response (MDR)

We integrate into your existing security stack and manage it efficiently 24/7. We proactively hunt for threats across your network, endpoints, cloud, and hybrid environments, allowing you to focus on your core operations.

- Make the most of tools you already own
- Quick and predictable deployment
- Advanced algorithms to protect from Zero-day threats
- 24/7/365 remote SOC
- Highly cost-effective

Penetration Testing

Our penetration testing service includes a sophisticated report with findings and recommendations on meeting specific security standards and guidelines on fixing vulnerabilities threatening your business.

- A one-step-ahead service to track vulnerabilities
- A proven testing approach and ability to choose the best solutions for specific needs
- The ideal combination of practical business and tech competencies

Incident Response Services

We leverage cutting-edge IR technologies to help you identify, disrupt, contain, and eject malefactors from the network. Instantly react to cyberattacks and prevent dire consequences.

- 5-star IR service rated by our clients globally
- Support throughout the entire IR lifecycle
- Ability to establish terms and conditions for IR services in advance

41 Ransomware response projects

Compliance & vCISO

Entrust routine IS operations, cybersecurity strategy, and compliance procedures to a remote IT security officer. We bring the necessary insights, expertise, and knowledge on how secure operations should be developed, implemented, run, and managed.

- Set up secure operations cost-effectively
- Comply with PCI DSS, SOC2 Type I & II, HIPAA, GDPR, CCPA, NY SHIELD Act requirements
- Benefit from free compliance policy templates

370 Successful Security Audits
